CATALOGUE

**National Tiles
& Ceramics Ltd.**

www.nationaltiles.com

We manufacture a wide range of ceramic tiles. All our tiles are carefully selected for quality and appearance.

National Tiles is specially developed for floors exposed to extreme stress. With slip resistances our Tiles are perfectly suitable for garages, car-washes and the like. Adjoining functional areas can also be designed with National Tiles. National Tiles for Car Parking Areas are the best solution for these types of places with long lasting quality and trafficable waterproof with slip resistance. The finished top surface would be the result of highly professional and technically handled relevance approach.

National Tiles gives a brighter, wider and cleaner look. The parking area could be designed with different color Tiles if required to create a pattern and Wall Tiles which make the walls along the driveways and the parking area look more proficient and magnificent. National Tiles can be applied at basements, intermediate decks, rooftop

parking areas and ramps (for ramps Unglazed Tiles are suggested). Each area has different sytem composition and application technique.

ADVANTAGES

- > Maintenance free – General mopping and hosing down of floor as when scheduled.
- > Long lasting.
- > Ensure the safer environment.
- > Anti-Slip finished reduce tyre squeal and avoid skidding during parking.
- > Hard wearing and abrasion resistant.
- > Resistant to battery acids, petrol, diesel, and other chemicals.
- > Available in unglazed and glazed finishes.
- > Excellent strength and resistance to cracks.
- > 100% UV stable for the life span of the floor.
- > Provides waterproof/water tight layer which enhances the structure's life span.

Shades

We have a wide variety of shades to choose from. National tiles gives you a complete range of tiles focusing on quality for durability maintenance and outlook.

TYPES OF TILES

The very basics of tile making are the most important when it comes to sustainability and maintenance. Conventional tiles do not have the strength to sustain applications. National Tiles are a masterly blend of the finest in traditional ceramics and modern extrusion and Split Technology. They are fired on very high temperatures (1180°C) five times longer than other tiles under the most grueling conditions in the largest tunnel kiln in the country. National Tiles combine the astonishing strength and elegance, making them the perfect choice for all kinds of floors and walls, Indoor and outdoor environments.

CHECKERED TILE

National Tiles, "Checkered Tiles" are designed for specialized requirements only. This series is used in mainly spaces where extreme grip is required.

The special Checkered Tiles can be manufactured in 10mm & 20mm thickness, depending on the area being used.

RAMPS AND TURNING CIRCLES

These areas require additional slip resistance. National Tiles Unglazed tiles are a perfect solution for such areas which help drivers in safe handling their vehicles while driving up and down the ramp.

* Checkered Tiles are recommended to be installed by National Tiles approved Tile laying team only.
